

March News

From the teacher's desk:

The Engineering Design Challenge is well on its way. NASA and its industry partners are currently working on a space vehicle called the Crew Exploration Vehicle (CEV). Its objective is to take astronauts to the Moon, Mars, and other destinations in space. We were fortunate enough to watch the launch of the SpaceX rocket live and this launched our own enthusiasm and interest. We currently are working on making modifications to our design in our efforts to launch them soon.

Students and parents joined us for the international fair on Feb 13th. Families and members of the community listened to presentations from DELTA Academy students about their chosen country. Students spent six weeks researching and creating a back board about their country.

Dates to remember:

- Parent Night March 13th @ 5:30pm in the DELTA Room 109c
- March 16th Teacher planning day, DELTA is closed.
- March 19th – 23rd Spring Break, DELTA is closed.
